

October 15, 2013

Dear Valued Customer,

It has come to our attention that a very important step was inadvertently left out of our instructions for the Max Clearance Lower Radius Bars for the Polaris RZR 1000 (Part Numbers PSRA-RZR1-O, PSRA-RZR1-R).

If you are running stock trailing arms on your Polaris RZR 1000, you will need to trim a small part of the trailing arm so the radius bars do not rub. This new step is written out and illustrated with photos in Step 8 found in the instructions included with this letter. *We highly recommend that you check your clearances before your next ride and make any adjustments necessary.*

If you have any issues or questions about replacing the updated instructions, please contact us at 800.699.0947, Monday through Friday from 8 a.m. to 5 p.m. CST.

We look forward to your continued business with High Lifter Products.

Sincerely,

James Cassell
General Manager
