

January 26, 2018

Dear Valued Customer:

You are receiving this letter because our records indicate you purchased a set of High Lifter Rear Raked Upper and Lower Control Arms for a Kawasaki Teryx; Part # MCRRA-KTRX-B. We are advising customers who have purchased these High Lifter rear arms, to make the **required** upgrades by adding an additional bracket to provide more support. We are offering this additional reinforcement kit at no cost to you. This **required upgrade is especially critical** for those who carry heavy loads or additional passengers. Please do not ride your Teryx until the required upgrade has been made.

High Lifter's Engineering team requires you to install the components, provided in the kit, Part# 75K-Kit-B. Please make sure to follow the instructions provided with the kit, for an accurate and complete installation. To receive this kit at no charge, simply call 800.699.0947 with your name, address plus proof of purchase and a kit will be mailed to you. If you sold the unit with the High Lifter Control Arms, please call or email us ([info@highlifter.com](mailto:info@highlifter.com)) with the buyers contact information immediately for us to send them their required upgrade kit.

Please install the required kit as soon as possible on your Teryx. Customer satisfaction and safety are top priority at High Lifter. Should you have any additional questions and to get your free reinforcement kit mailed out, please give us a call at 800-699-0947.

Thank you,

Brian Smith

Engineering Manager
